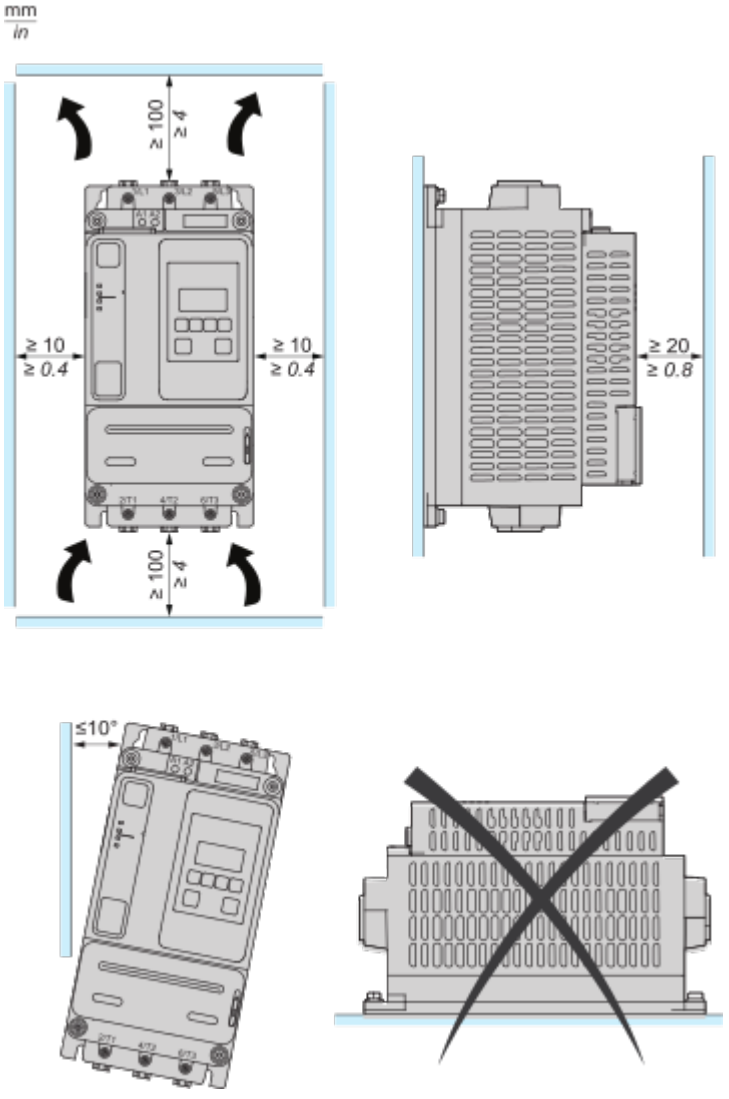
Mounting and Clearance

Mounting Position

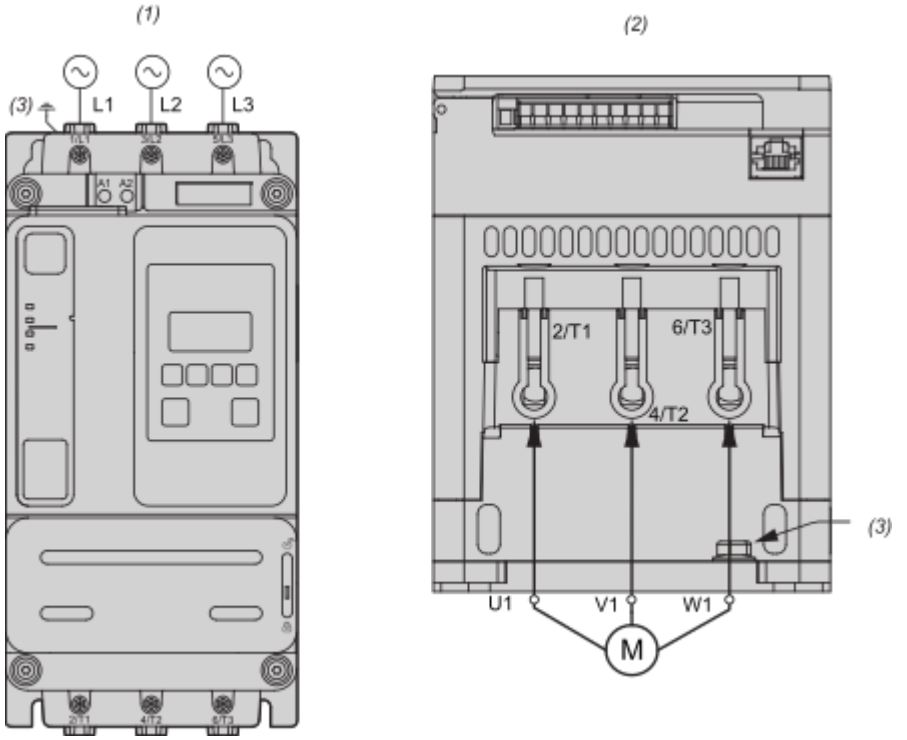
The soft starter is designed to be mounted inside cabinets vertically at ± 10° for cooling purposes.Respect the minimum clearances so that the cooling air can circulate from the bottom to the top of the soft starter. The minimum clearances apply to any device close to the soft starter such as circuit breakers, fuses and contactors.Do not install the soft starter above heating elements.



Connections and Schema

Wiring

Wiring the Power Part



Use class C cables for the power connections.
