Overview of Altivar™ 12

Altivar™ 12 variable frequency drives are compact motor control solutions designed for simple machine applications such as conveyors, mixers, gate control, and machine movement. Available for single-phase and three-phase power supplies, they support motor ratings from 1/4 to 5 hp and provide an output frequency range of 0.5 to 400 Hz for flexible speed control.

The drive features sensorless flux vector control for asynchronous motors, supports up to 170% transient overtorque, and includes 40 integrated functions with built-in I/O and Modbus™ communication. With an IP20 enclosure and certifications including UL, CSA, CE, and IEC/EN standards, the Altivar 12 offers a reliable and economical solution for a wide range of industrial machine control applications.

For additional information, refer to [Altivar 12 drives](#) and [Variable Speed Drives and Soft Starters](#) online.

Overview of Altivar™ 320

Altivar™ 320 variable speed drives are designed for complex machine applications including material handling, packaging, textiles, mechanical actuators, material working, and hoisting. The drives are available in both compact and book-style formats. They support single-phase and three-phase voltage ranges from 200 to 600 V, with motor ratings from 1/4 hp to 20 hp and output frequencies up to 599 Hz.

The Altivar 320 drives offer advanced control for asynchronous and synchronous motors, delivering up to 200% transient overtorque, more than 150 built-in functions, flexible I/O configurations, and integrated CANopen and Modbus communications with multiple industrial network options. Certified to major international standards including UL, CSA, CE, and IEC, this makes the Altivar 320 a reliable, high-performance solution for OEM machine builders and industrial automation applications.

For additional information, refer to [Altivar 320 drives](#) and [Variable Speed Drives and Soft Starters](#) online.

Overview of Altivar™ 340

The Altivar™ 340 product line is a high-performance variable speed drive solution designed for complex machine applications, including material handling, packaging, textiles, mechanical actuators, material processing, and hoisting systems. These drives support both asynchronous and synchronous motors, offering advanced motor control, high dynamic performance, and transient overload capabilities up to 200% rated torque. They are available for 380 to 480 V three-phase power supplies with ratings from 1 to 100 hp.

The Altivar™ 340 features more than 150 integrated functions, extensive I/O options, and built-in communication protocols including EtherNet/IP, Modbus TCP, and Modbus Serial. These drives provide flexible machine integration and connectivity. The drives are certified to major international standards including UL, CSA, CE, and TÜV, making them a reliable choice for machine builders seeking efficient, connected, and compliant motor control solutions.

For additional information, refer to [Altivar 340 drives](#) and [Variable Speed Drives and Soft Starters](#) online.

Overview of Altivar™ Process 900

Altivar™ Process 900 drives are high-performance variable speed drives for demanding applications such as material handling, artificial lift, cranes, hoists, extruders, shredders, presses, and positive displacement pumps. They support three-phase voltage ranges from 200 to 690 V, motor ratings from 1 to 500 hp, and output frequencies up to 599 Hz, delivering precise control for both asynchronous and synchronous motors.

The Altivar Process 900 provides flexibility for complex automation system by offering advanced motor control technologies, 45+ integrated functions, extensive I/O capabilities, built-in Modbus™ and Ethernet/IP communications, and optional industrial networking protocols. The drives are available with Type 1 and Type 12 enclosure options and meet key industry standards including UL 508C, CSA, and IEC certifications for reliable operation in industrial environments.

For additional information, refer to [Altivar Process 900 Drives](#) and [Variable Speed Drives and Soft Starters](#) online.

Overview of Altivar™ 212 and Altivar Process 600

Altivar 212 and Altivar Process 600 are two of Schneider Electric's variable frequency drive (VFD) families designed primarily for pump and fan applications. Available for 200–690 V three-phase power systems depending on model. Multiple enclosure options including Type 1, Type 12, and IP20 configurations. Certified to international standards including UL, CSA, IEC, and CE requirements.

The Altivar 212 is a cost-effective HVAC-focused drive for centrifugal pumps and fans in commercial buildings. It supports asynchronous motors with V/Hz and sensorless vector control and offers horsepower ratings up to 100 hp, and includes built-in building automation communication protocols. The Altivar Process 600 is an advanced process-industry drive for pumps, fans, and general industrial applications including water and wastewater, oil and gas, mining and metals, etc. It supports both asynchronous and permanent magnet motors and offers power ratings up to 500 hp, provides more than 30 pump functions, advanced I/O capability, safety inputs, and extensive industrial network options.

For additional information, refer to [Altivar Process 600 Drives](#) and [Variable Speed Drives and Soft Starters](#) online.

Overview of Altivar™ 01, 22, and 480 Soft Starters

Altistart 01 is a compact soft starter designed for simple machine control applications such as conveyors, mixers, gate control systems, machine movement, and small pumps and fans. It supports motors from 1/4 hp to 75 hp depending on voltage and provides reduced-voltage starting for basic motor starting requirements.

Altistart 22 is engineered for normal-duty industrial applications including pumps, fans, turbines, compressors, conveyors, and escalators. With motor ratings up to 500 hp, it offers controlled starting and stopping through voltage and torque control, along with embedded Modbus communications and expanded I/O capabilities for greater flexibility and machine integration.

Altistart 480 is Schneider Electric's advanced soft starter for heavy-duty applications such as crushers, punch presses, band saws, high-inertia conveyors, pumps, and fans. Rated for motors up to 1200 hp, it provides advanced torque and voltage control, extensive diagnostics, multiple communication protocol options including EtherNet/IP, PROFINET, and PROFIBUS, and a broad range of global certifications for demanding industrial environments.

For additional information, refer to [Variable Speed Drives and Soft Starters](#) online.

Overview of S-Flex™ and Altistart™ Enclosed 22 / Enclosed 480

Schneider Electric's S-Flex™ (Altivar™ 212) adjustable speed drives and Altistart™ Enclosed 22 and Enclosed 480 soft starters are designed for commercial and industrial motor control applications. These enclosed solutions are designed for pumps, fans, compressors, conveyors, mixers, and other machinery, with integrated controls, disconnects, circuit protection, communication capabilities, and application-specific options.

The following table covers available voltage and horsepower ranges, enclosure types (Type 1, Type 12, and Type 3R), configurable bypass and isolation options, and network communication protocols such as Modbus, BACnet, EtherNet/IP, and PROFINET. It also highlights compliance with major industry certifications and standards, including UL, cUL/CSA, IEC, NFPA, and seismic qualification requirements.

Overview of Altivar™ 680/980 Process and Altivar 660/960 Process

Schneider Electric's Altivar™ Process drive systems are designed for demanding industrial applications such as water and wastewater, oil and gas, mining, metals, food and beverage, and regenerative systems. The following table highlights the Altivar 680/980 low harmonic drives, featuring industry-leading harmonic mitigation with THDi levels as low as 2.3%, compact footprints, regenerative capabilities, and advanced performance for pumping and mechanical movement applications.

The following table also covers the Altivar 660/960 Process Drive Systems, offering fully tested, ready-to-connect drive solutions ranging from compact pre-engineered systems to complex engineered configurations. Key features include embedded process control, web server functionality, pump curves, dynamic QR codes, multiple enclosure options (UL Type 1, 12, and 3R), and broad power ranges. The products are UL/cUL listed, IEEE 519 compliant, and designed to meet applicable NEMA, NFPA, IEC, and ISO 9001 standards.

	Altivar 680/980 Process Drives <i>New!</i>	Altivar 660/960 Process Drives													
															
Brief Description	The world's first three-level low harmonic drive, Altivar 680/980 drive solutions are designed for pumping or mechanical movement applications where harmonic mitigation and overall size is a priority. The ATV680/980 has embedded, industry-leading harmonic mitigation technology, which results in THDi levels of 2.3%. With its small footprint and capability to be customized, the ATV680/980 is a very flexible low harmonic solution. The ATV680/980 is a more efficient, more compact, and higher performing active rectification drive than any of our competitors by the integration of a common mode suppressing filter, and unique active filter resonance control. The ATV680 is capable of 120% regeneration, while the ATV980 is capable of 180% of nameplate current.		The Altivar 660 Process System provides a wide range of fully tested and ready to connect drive solution. Starting from a compact pre engineered system to a fully engineered complex solution.

Overview of Altivar™ Outdoor 630/930

Altivar™ Outdoor 630/930 variable speed drives are engineered for outdoor pumping applications in demanding industries such as oil and gas and irrigation. The drives support applications including rod pumps, progressive cavity pumps (PCP), electric submersible pumps (ESP), and horizontal pumping systems (HPS).

Designed with a NEMA Type 3R outdoor enclosure, Altivar Outdoor 630/930 offers reliable operation in harsh environments, with a 20 to 250 hp heavy-duty power range, 480 Vac operation, and 50°C ambient temperature rating. Key features include a door-on-door design, optional cold weather package, extensive customization options, and quick lead times. The drives are UL 508A listed and conform to applicable NEMA, NFPA, and IEC standards, making them a robust solution for outdoor industrial pumping applications.

For additional information, refer to [Variable Speed Drives and Soft Starters](#) online.

Altivar Outdoor 630/930

Key Application/Market Segment	- Oil and Gas - Rod Pump Controls, PCP Controls - ESP Controls, HPS Controls - Irrigation
Brief Description	The Altivar Outdoor 630/930 is a UL Type 3R rated drive designed for pumping solutions in outdoor environments, especially oil and gas.
Special Features	- Door-on-door 50 °C rated - Optional cold weather option - Wide array of options available - Quick lead time
Enclosure Ratings	Nema Type 3R Outdoor
Power Range	20–250 hp, Heavy Duty
Distribution Voltage Ranges for 50/60 Hz Line Supply	480 Vac
Standards / Certifications	- UL Listed per UL 508A - Conforms to applicable NEMA ICS, NFPA, & IEC standards - Service entrance rated - Manufactured under ISO 9001 standards
Contact your local Schneider Electric Field Office for additional information.	

Altivar™ 212 Drives

The AHRI (Air-Conditioning, Heating, & Refrigeration Institute) certified Altivar 212 drive is for use with three-phase asynchronous and permanent magnet motors for variable torque pump, fan, and scroll compressor applications. Select the Altivar 212 drive using the motor nameplate voltage, the full load ampere rating and the table below. The Altivar 212 drive includes 3 logic inputs, 2 analog inputs, 1 analog output, and 2 relay outputs (with 1 NO and 1 NO/NC contacts). The Altivar 212 drive includes an integrated 4 digit, 7 segment LED display with a 7 button keypad and includes an RJ45 Modbus port plus a four-screw terminal block for BACnet, Modbus, Metasys N2 and Apogee P1 communication protocols. LonWorks™ is available in an option card.

[4] IP20 Altivar 212 drives can be installed as UL Type 1 with an optional conduit box by following the instructions in the installation manual.
[5] Not required if using VW3A1102.
[6] For ATV212W... drives with Class B EMC filter, add the letter "C" to the end of the standard catalog number.

Altivar™ 12 Drives

Big function in a small footprint. The Altivar 12 variable frequency drive combines flexibility, reliability, and the most advanced sensorless flux vector technology into very small space. This drive features an integrated communications port, user-friendly navigation wheel on the faceplate, and an optional multi-loader that streamlines set-up by making programming quick and easy. All of this comes with the versatility to handle applications from simple to complex, across industries, and harsh environments.

Altivar™ 320 Machine

The new benchmark in machine performance. Altivar 320, part of the new Altivar™ Machine range, is a powerful combination of safety, reliability, and simplicity which makes it a versatile choice that reduces costs both during installation and throughout the machine's life cycle. Altivar 320 has a number of out-of-the-box features for building more effective machines.

Altivar 340 Machine Drives

Altivar™ 340 Machine

Stay on top of the Smart Machine Era! Altivar Machine ATV340 is engineered for high performance application requirements by maximizing the machine performance thanks to real time variable speed drive operation, more connectivity, flexibility, and scalable safety. The ATV340 is available from 1 to 100 hp with the ability to control any kind of motor in open and closed loop.

[8] Normal duty applications requiring an overload up to 110% for 60 seconds. Typical for variable torque loads.

[9] Heavy duty applications requiring an overload up to 150% for 60 seconds. Typical for constant torque loads.

[10] These values are given for a nominal switching frequency of 4 kHz up to ATV630D45N4, or 2.5 kHz for ATV630D55N4...D90N4 for use in continuous operation. The switching frequency is adjustable from 1...16 kHz for all ratings. Above 2.5 or 4 kHz (depending on the rating), the drive will automatically reduce the switching frequency in the event of an excessive temperature rise. For continuous operation above the nominal switching frequency, derate the nominal drive current (see the derating curves on our website www.schneider-electric.com).

[11] Typical value for the indicated motor power and for the maximum prospective line Isc.

S-Flex 212 Enclosed Drive Controller Type 1, 12, 3R
Rated +14 to +104 °F
(-10 to +40 °C)

S-Flex™ Variable Torque AC Drive—208 V, 230 V, and 460 V Ratings

The AHRI certified S-Flex enclosed drive features the Altivar 212 drive and provides 100 KAIC rating for commercial pump, fan, and scroll compressor applications.

The S-Flex is an economical package that includes a circuit breaker disconnect and option bypass contactors, drive input disconnect switch or line contactor.

The S-Flex is rated as a UL Type 1, 12, and 3R enclosure an ideal for use in residential high rise and mixed-use buildings, commercial office buildings, schools and campus environments.

All S-Flex 212 Enclosed Drives are supplied with:

- Altivar™ 212 power converter
- Square D™ circuit breaker disconnect (Power Fuses for 460 V version only)
- Coordinated short circuit rating for 100,000 A
- Adjustable Frequency Controller-Off-Bypass selector switch
- Local/Remote configurable on controller
- Power On red LED
- Bypass Run green LED
- Fire/Freezestat interlock for Adjustable Frequency Drive and Bypass mode
- Form C Adjustable Frequency Controller fault auxiliary contact
- Modbus RJ-45 communication port
- Smoke Purge Function
- Bypass Run Auxiliary Contact
- Drive Run Auxiliary Contact
- Full Voltage Bypass Power Circuit with overload relay
- 120 Vac fused control power transformer

[3] For UL Type 12 and 3R only.

Altistart™ 22 Soft Starters

The Altistart 22 is designed for commercial and normal duty industrial applications, it uses both voltage and torque control to provide a soft start and soft stop for three-phase asynchronous motors between 17 A and 590 A. The conformal-coated, printed circuit boards provide enhanced resistance to harsh environments, increasing the service life of installations and lowering maintenance costs.

Select the Altistart 22 soft starter using the nameplate full-load ampere rating of the motor and the table below. The horsepower ratings are for reference only.

Altistart™ 430 Soft Starters

Effective Motor Management

Altivar Soft Starter ATS430 is the new comprehensive range of soft starters from Schneider Electric for standard industrial machines. It provides functions for effective motor management, including operational performance, reliability, protection, integration in the automation system, and energy efficiency.

Altivar Soft Starter ATS430 is designed to deliver:

- Best-in-class motor control
- High-durability performance to reduce downtime and extend lifespan
- Superior sustainability through energy efficiency and resources preservation
- Cost reduction at each phase of the life cycle

ATS430 covers the operational voltage range from 208 to 600 V in a single product range from 17 up to 590 A to meet the requirements of the most stringent applications in normal duty. The range embeds best practice cybersecurity functions helping to protect operations, and integrates condition monitoring of its most sensitive parts.

Best-in-class Motor Control

ATS430 integrates the TCS (torque control system) to ensure smooth acceleration, deceleration, and preserve the mechanics and hydraulics. Monitoring of the motor, application, power, and energy is built-in; all the data is available to users and the automation system.

High-durability Performance

Altivar Soft Starter ATS430 is designed to help ensure operational continuity. The high-durability performance of ATS430 allows downtime and operational expenditure to be reduced and equipment lifespan to be extended. Durability encompasses:

- Reliability
- Upgradability
- Repairability

Reliability by Design

ATS430 withstands high stress from several sources, whether environmental or operational. It offers enhanced robustness in:

- Thermal conditions, with an extended operating ambient temperature range from -25 to 60°C/13 to 140°F (with derating above 40°C/104°F)
- Mechanical conditions, by using a long-lasting power connection with integrated EverLink™ technology and complying with class 3M3 and class 3S3 according to IEC 60721-3-3 ed. 2002
- Chemical conditions, by complying with class 3C3 according to IEC 60721-3-3 ed. 2002 with salt mist
- Electrical conditions, thanks to a large mains voltage range from 208 to 600 V and a large mains frequency range from 50 or 60 Hz +/-20%

Torque control, the boost function, and the ATS430 starting capabilities all help to increase the resistance to stress originating from the application.

Cybersecurity Best Practices

As limiting events resulting in downtime can also be caused by operators, the ATS430 embeds best practice cybersecurity functions covering:

- User account management, including user authentication, role-based authorization, access channels, and strong passwords
- Tougher access to restrict ports, functions, or services
- Threat intelligence to manage cybersecurity-related events
- Cybersecurity-compliant firmware upgrade

Altistart™ 480 Soft Starters

The Altivar Soft Starter ATS480 is a controller with six thyristors using the TCS (torque control system) algorithm to control acceleration, deceleration, and stopping of three-phase squirrel cage asynchronous motors up to 900 kW.

The ATS480 is a cost-effective solution designed to:

- Reduce machine operating costs by reducing mechanical stress and improving machine availability
- Reduce the risk of severe damage by reducing fluid shocks
- Reduce the stress on the electrical distribution system by reducing line current peaks and voltage drops during motor starts

Altivar Soft Starter ATS480 consists of one range only covering:

- Operational voltage from 208 V to 690 V
- Operational current from 17 A to 1200 A

ATS480 integrates Modbus serial line communication protocols as standard. Each device is equipped with two RJ45 ports for:

- Connection to configuration and firmware update software
- Connection of the plain text display terminal or graphic display terminal
- Connection to a Modbus fieldbus

In addition, the ATS480 is equipped with one slot for a communication module:

- Modbus TCP
- CANopen
- PROFIBUS DP
- EtherNet/IP
- PROFINET

New!

Altistart™ 490 Soft Starters**Your assets are priority**

Altivar Soft Starter ATS490 is the new comprehensive range of soft starters from Schneider Electric providing advanced motor management for the majority of industrial applications. It offers operational performance, reliability, complete monitoring, integration in the automation system, and energy efficiency.

Altivar Soft Starter ATS490 is designed to deliver:

- High-durability performance to maximize uptime with service life
- Superior sustainability
- Cost reduction at each phase of the service life

ATS490 covers the operational voltage range from 208 to 690 V in a single product range up to 1200 A, meets the requirements of the most stringent applications in normal and heavy duty. The range embeds innovative features that simplify the equipment and its design, while minimizing risks through certification.

Improving operational resilience

Altivar Soft Starter ATS490 is designed to help ensure continuity of operation. The high-durability performance of ATS490 applies not only to the product itself but also to the whole system to avoid disruption and reduce downtime.

Enhanced reliability

ATS490 withstands high stress from several origins, whether environmental or operational. It offers enhanced robustness against:

- Thermal conditions with an extended ambient operating temperature from -25 to 60° C/-13 to 140°F (with derating above 40°C/104°F)
- Mechanical conditions by using a long-lasting power connection with integrated EverLink™ technology and complying with class 3S3 according to IEC 60721-3-3
- Chemical conditions by complying with class 3C3 according to IEC 60721-3-3 ed. 2002 with salt mist
- Electrical conditions thanks to a large mains voltage range from 208 to 690 V and a large mains frequency range from 50 or 60 Hz +/-20%

The reliability on operating stress is also reinforced by TCS, the original Torque Control System by Schneider Electric, and by its starting capabilities that include high starting duration and high number of starts per hour.

Certified cybersecurity functions

ATS490 integrates IEC 62443-4-2 cybersecurity features certified by TÜV Rheinland with a development process that is IEC 62443-4-1 certified. The embedded functions include:

- User account management, including user authentication, role-based authorization, access channels, and strong passwords
- Tougher access to restrict communication ports and related functions or services
- Threat intelligence to manage cybersecurity-related events
- Cybersecurity-compliant firmware upgrade

The nominal motor current I_n must not exceed the operational rated current I_e.

[7] Current on operation at a maximum ambient temperature of 40°C (104°F). Above 40°C (104°F) and up to an ambient temperature of 60°C (140°F), derate current by 1% each °C (1.8°F).

Table 18.28: Starting Capabilities of ATS490 According to the Service Duty

Application Duty	Overloading (Starting)		Service Cycle	
	Overcurrent	Duration	No. of Starts/h	Conduction
From an application standpoint, the overload is defined depending on the service duty of the motor, S1 (continuous operation) or S4 (intermittent operation).				
S1 (Continuous operation)				
Normal duty	4 x In	23 s	Continuous operation after starting	
	3 x In	46 s		
Heavy duty	4 x In	48 s	Continuous operation after starting	
	3 x In	90 s		
S4 (Intermittent operation)				
ATS490D17Y...C17Y				
Normal duty	4 x In	13 s	10	50%
	3 x In	23 s		
Heavy duty	4 x In	25 s	10	50%
ATS490C21Y...M12Y				
Normal duty	4 x In	13 s	6	50%
	3 x In	23 s		
Heavy duty	4 x In	25 s	6	50%
Each application duty has a corresponding motor protection class:				
• Normal duty → motor thermal protection Class 10E • Heavy duty → motor thermal protection Class 20E

Enclosed Altistart™ 22 Motor Controllers

Enclosed Altistart 22 (ATS22) solid-state combination motor controllers are a pre-engineered, integrated solution for reduced voltage starting and soft stopping of standard three-phase asynchronous induction (squirrel cage) motors. The Enclosed 22 controllers consist of a disconnect means and an ATS22 softstarter in a stand-alone enclosure. Enclosed 22 controllers integrate the ATS22 softstart technology into a combination package for application requirements up to 400 hp at 460 V.

- 3–150 hp, 208 V
- 5–200 hp, 230 V
- 10–400 hp, 460 V
- 15–500 hp, 575V

Table 18.32: Enclosed Altistart 22 Catalog Number Description

Field	Digit	Characteristic	Description
—	—	Controller Class	8638 = Fused Disconnect [1] 8639 = Circuit Breaker Disconnect
01	1–3	Controller Style	22F = Altistart 22 with Class J Fuse Clips and Molded Case Switch [1] 22T = Altistart 22 with PowerPact Motor Circuit Protector 22U = Altistart 22 with PowerPact Thermal-Magnetic Circuit Breaker
02	4	Horsepower	A = 3 hp B = 5 hp C = 7.5 hp D = 10 hp E = 15 hp F = 20 hp G = 25 hp H = 30 hp J = 40 hp K = 50 hp L = 60 hp M = 75 hp N = 100 hp P = 125 hp Q = 150 hp R = 200 hp S = 250 hp T = 300 hp U = 350 hp W = 400 hp X = 500 hp

Table 18.33: Enclosed Altistart 22 Catalog Number Example:

863922UCG4BA06A07

Field	1	2	3	4	5	6	7
—	1	2	3	4	5	6	7
8639	22U	C	G	4	B	A06	A07
Controller Class	PowerPact™ Thermal-Magnetic Circuit Breaker	7.5 hp	Type 1 General Purpose	460 Vac	Basic Shunt Trip	Start-Stop Push Button	Run Light (Red), Off Light (Green)

[1] This option is not selectable with power circuit option B05.

[2] Select only one option.

[3] To omit, do not include a selection in the catalog number.

[4] This option is available only for enclosure size D.

[5] This option is not selectable with power circuit option B05.

[6] This option is not selectable with power circuit option B05. This option is valid only with the following control options: C06, D06, or E06.

[7] Options E10 and Z10 cannot be used together.

[8] This option is not selectable with power circuit option B05. The contacts are available only when power circuit option Y05 is selected.

[9] The contacts are not available when power circuit option R05 is selected. This option is valid only with the following control options: C06, D06, or E06.

[10] If you select option U10, you must separately order the remote keypad (VW3G22101) and cable (VW3A1104R30) to commission the softstarter. Refer to the *ATS22 User Manual*, BBV51330, for serial communication programming and control capabilities.

[11] Options E10 and Z10 cannot be ordered together.

Enclosed Altistart 22 Control Options (pick one)

Mod A06	Start/Stop push buttons Provides black start and red stop push buttons (3-wire control scheme).
Mod B06	Forward-Off-Reverse selector switch Provides three-position selector switch to select between forward, off and reverse. Uses 2-wire control.
Mod C06	Hand-Off-Auto selector switch Provides a three-position selector switch, 2-wire control scheme.
Mod D06	Stop-Run selector switch Provides a two-position selector switch.
Mod E06	Hand-Auto selector switch and Start/Stop push buttons Provides a two-position selector switch and start/stop push buttons (3-wire control).

Enclosed Altistart 22 Pilot Light Cluster Options (pick one)

Mod A07	Pilot light cluster #1 Consists of red "RUN" and green "OFF" pilot lights. Provides standard red "RUN (ON)" and green "OFF" pilot lights for status annunciation.
Mod B07	Pilot light cluster #2 Consists of red "RUN" (push-to-test) and green "OFF" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)" and standard green "OFF" pilot lights for status annunciation.
Mod C07	Pilot light cluster #3 Consists of red "RUN", green "OFF" and yellow "FAULT" pilot lights. Provides standard red "RUN (ON)", green "OFF" and yellow "FAULT" pilot lights for status annunciation.
Mod D07	Pilot light cluster #4 Consists of red "RUN (ON)" (push-to-test), green "OFF" (push-to-test) and yellow "FAULT" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)", standard green "OFF", and push-to-test type yellow "FAULT" for status annunciation.

Enclosed Altistart 22 Meter Display Options (pick one)

Mod B08	Elapsed time meter Provides a seven-digit analog, non-resettable elapsed run time meter. Not available on Type 3R Enclosures
---------	---

Enclosed Altistart 22 Miscellaneous Options (multiple compatible options may be selected)

Mod A10	Floor mounting kit Only available for size D enclosures.
Rules: Available for power options S05, N05, R05, Y05.	
Mod B10	150 VA additional control power capacity Provides 150 VA additional control VA capacity for customer use.

Information and Selection of AC Drives

For product information and selection, visit [Variable Speed Drives](#) on [www.se.com/us](#)

Technical Support and Services for AC Drives

Drive Product Support Group

For support and assistance, contact the Drive Product Support Group. The Drive Product Support Group is staffed from 8:00 am until 8:00 pm Eastern time to assist with diagnosis of product problems. For support with applications or product selection, please contact a drive specialist at your local authorized Schneider Electric Distributor. Click here to locate an Automation and Control distributor near you: [Find Electrical, Automation, and Control Distributors](#).

EMERGENCY Technical phone support is available 24 hours a day, 365 days a year.

Toll Free: 888-778-2733
E-mail: drive.products.support@schneider-electric.com
Fax: 919-217-6508

Schneider Electric Services

Schneider Electric offers a broad range of Services for electrical distribution assets and systems to support the lifecycle of your equipment, for any manufacturer's. With 6,500+ experts and 260+ consultants in electrical and automation asset management services in 140 countries within 430 Services centers, Schneider Electric Services responds to your requests, seven days a week, 24 hours a day.

Toll Free (888-778-2733)

[se.com/us/services](#)

Customer Training for AC Drives

Schneider Electric offers a variety of instructor-led, skill enhancing and technical product training programs for customers. For a complete list of drives/soft starter training with dates, locations, and pricing, please call:

Phone: 978-975-9306
Fax: 978-975-2821

Packaged Product Documentation for AC Drives

Standard Documentation

Each adjustable frequency drive or soft starter shipped includes one set of instruction bulletins. Each set of instruction bulletins includes installation, start-up, troubleshooting and wiring diagram information. Separate Approval and/or Record Drawings are not included.

Approval and Record Drawings

All factory orders for enclosed drives and soft starters come with factory supplied user drawings and are identified by a factory order number. The factory supplied drawing set typically includes:

- Enclosure outline drawing
- Power elementary drawing
- Control elementary drawing
- Interconnection drawing

These drawings are also available in DWG, DXF, IGS, Microcad and PDF formats upon customer request.
